

2018 年考研英语二真题及答案

Section I Use of English

Directions: Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on the ANSWER SHEET. (10 points)

Why do people read negative Internet comments and do other things that will obviously be painful? Because humans have an inherent need to ___1___ uncertainty, according to a recent study in Psychological Science. The new research reveals that the need to know is so strong that people will ___2___ to satisfy their curiosity even when it is clear the answer will ___3___.

In a series of four experiments, behavioral scientists at the University of Chicago Booth School of Business and the Wisconsin School of Business tested students' willingness to ___4___ themselves to unpleasant stimuli in an effort to satisfy curiosity. For one ___5___, each participant was shown a pile of pens that the researcher claimed were from a previous experiment. The twist? Half of the pens would ___6___ an electric shock when clicked.

Twenty-seven students were told which pens were rigged; another twenty-seven were told only that some were electrified. ___7___ left alone in the room, the students who did not know which ones would shock them clicked more pens and incurred more jolts than the students who knew what would ___8___. Subsequent experiments replicated this effect with other stimuli, ___9___ the sound of fingernails on a chalkboard and photographs of disgusting insects.

The drive to ___10___ is deeply ingrained in humans, much the same as the basic drives ___11___ or shelter, says Christopher Hsee of the University of Chicago, a co-author of the paper. Curiosity is often considered a good instinct—it can ___12___ new scientific advances, for instance—but sometimes such ___13___ can backfire. The insight that curiosity can drive you to do ___14___ things is a profound one.

Unhealthy curiosity is possible to ___15___, however. In a final experiment, participants who were encouraged to ___16___ how they would feel after viewing an unpleasant picture were less likely to ___17___ to see such an image. These results suggest that imagining the ___18___ of following through on one's curiosity ahead of time can help determine ___19___ it is worth the endeavor. "Thinking about long-term ___20___ is key to mitigating the possible negative effects of curiosity," Hsee says. In other words, don't read online comments.

1. A. Ignore B. protect C. discuss D. resolve
2. A. refuse B. seek C. wait D. regret
3. A. rise B. last C. hurt D. mislead
4. A. alert B. expose C. tie D. treat
5. A. trial B. message C. review D. concept
6. A. remove B. deliver C. weaken D. interrupt
7. A. Unless B. If C. When D. Though

8. A. change B. continue C. disappear D. happen
9. A. such as B. rather than C. regardless of D. owing to
10. A. disagree B. forgive C. discover D. forget
11. A. pay B. food C. marriage D. schooling
12. A. begin with B. rest on C. lead to D. learn from
13. A. inquiry B. withdrawal C. persistence D. diligence
14. A. self-deceptive B. self-reliant C. self-evident D. self-destructive
15. A. trace B. define C. replace D. resist
16. A. conceal B. overlook C. design D. predict
17. A. choose B. remember C. promise D. pretend
18. A. relief B. outcome C. plan D. duty
19. A. how B. why C. where D. whether
20. A. limitations B. investments C. consequences D. strategies

Section II Reading Comprehension

Part A

Directions: *Read the following four texts. Answer the questions after each text by choosing [A],[B],[C] or [D]. Mark your answers on ANSWER SHEET 1. (40 points)*

Text 1

It is curious that Stephen Koziatek feels almost as though he has to justify his efforts to give his students a better future.

Mr. Koziatek is part of something pioneering. He is a teacher at a New Hampshire high school where learning is not something of books and tests and rote memorization, but practical, reports staff writer Stacy Teicher Khadaroo in this week's cover story. When did it become accepted wisdom that students should be able to name the 13th president of the United States but be utterly bamboozled by a busted bike chain?

As Koziatek knows, there is learning in just about everything. Nothing is necessarily gained by forcing students to learn geometry at a graffitied desk stuck with generations of discarded chewing gum. They can also learn geometry by assembling a bicycle.

But he's also found a kind of insidious prejudice. Working with your hands is seen as almost a mark of inferiority. Schools in the family of vocational education "have that stereotype ... that it's for kids who can't make it academically," he says.

On one hand, that viewpoint is a logical product of America's evolution. Manufacturing is not the economic engine that it once was. The job security that the US economy once offered to high school graduates has largely evaporated. More education is the new mantra. We want more for our kids, and rightfully so.

But the headlong push into bachelor's degrees for all – and the subtle devaluing of anything less – misses an important point: That's not the only thing the American economy needs. Yes, a bachelor's degree opens more doors. But even now, 54 percent

of the jobs in the country are middle-skill jobs, such as construction and high-skill manufacturing. But only 44 percent of workers are adequately trained.

In other words, at a time when the working class has turned the country on its political head, frustrated that the opportunity that once defined America is vanishing, one obvious solution is staring us in the face. There is a gap in working-class jobs, but the workers who need those jobs most aren't equipped to do them. Koziatek's Manchester School of Technology High School is trying to fill that gap.

Koziatek's school is a wake-up call. When education becomes one-size-fits-all, it risks overlooking a nation's diversity of gifts.

21. A broken bike chain is mentioned to show student's lack of.

- A. academic training
- B. practical ability
- C. pioneering spirit
- D. mechanical memorization

22. There exists the prejudice that vocational education is for kids who.

- A. have a stereotyped mind
- B. have no career motivation
- C. are financially disadvantaged
- D. are not academically successful

23. We can infer from Paragraph 5 that high school graduates.

- A. used to have more job opportunities
- B. used to have big financial concerns
- C. are entitled to more educational privileges
- D. are reluctant to work in manufacturing

24. The headlong push into bachelors degrees for all.

- A. helps create a lot of middle-class jobs
- B. may narrow the gap in working-class jobs
- C. indicates the overvaluing of higher education
- D. is expected to yield a better-trained workforce

25. The author's attitude toward Koziatek's school can be described as.

- A. tolerant
- B. cautious
- C. supportive
- D. disappointed

Text 2

While fossil fuels - coal, oil, gas - still generate roughly 85 percent of the world's energy supply, it's clearer than ever that the future belongs to renewable sources such as wind and solar. The move to renewable is picking up momentum around the world: They now account for more than half of new power sources going on line.

Some growth stems from a commitment by governments and farsighted businesses to fund cleaner energy sources. But increasingly the story is about the plummeting prices of renewables, especially wind and solar. The cost of solar panels

has dropped by 80 percent and the cost of wind turbines by close to one-third in the past eight years.

In many parts of the world renewable energy is already a principal energy source. In Scotland, for example, wind turbines provide enough electricity to power 95 percent of homes. While the rest of the world takes the lead, notably China and Europe, the United States is also seeing a remarkable shift. In March, for the first time, wind and solar power accounted for more than 10 percent of the power generated in the US, reported the US Energy Information Administration.

President Trump has underlined fossil fuels – especially coal – as the path to economic growth. In a recent speech in Iowa, he dismissed wind power as an unreliable energy source. But that message did not play well with many in Iowa, where wind turbines dot the fields and provide 36 percent of the state's electricity generation – and where tech giants like Microsoft are being attracted by the availability of clean energy to power their data centers.

The question “what happens when the wind doesn't blow or the sun doesn't shine?” has provided a quick put-down for skeptics. But a boost in the storage capacity of batteries is making their ability to keep power flowing around the clock more likely.

The advance is driven in part by vehicle manufacturers, who are placing big bets on battery-powered vehicles. Although electric cars are still a rarity on roads now, this massive investment could change the picture rapidly in coming years.

While there's a long way to go, the trend lines for renewables are spiking. The pace of change in energy sources appears to be speeding up – perhaps just in time to have a meaningful effect in showing climate change. What Washington does – or doesn't do – to promote alternative energy may mean less and less at a time of a global shift in thought.

26. The word “plummeting” (Line 3, Para.2) is closest in meaning to_____.

- A. stabilizing
- B. changing
- C. falling
- D. rising

27. According to Paragraph 3, the use of renewable energy in America_____.

- A. is progressing notably
- B. is as extensive as in Europe
- C. faces many challenges
- D. has proved to be impractical

28. It can be learned that in Iowa,_____.

- A. wind is a widely used energy source.
- B. wind energy has replaced fossil fuels
- C. tech giants are investing in clean energy
- D. there is a shortage of clean energy supply

29. Which of the following is true about clean energy according to Paragraphs 5 & 6?

- A. Its application has boosted battery storage.

- B. It is commonly used in car manufacturing.
- C. Its continuous supply is becoming a reality.
- D. Its sustainable exploitation will remain difficult.

30. It can be inferred from the last paragraph that renewable energy ____.

- A. will bring the US closer to other countries
- B. will accelerate global environmental change
- C. is not really encouraged by the US government
- D. is not competitive enough with regard to its cost

Text 3

The power and ambition of the giants of the digital economy is astonishing – Amazon has just announced the purchase of the upmarket grocery chain Whole Foods for \$13.5bn, but two years ago Facebook paid even more than that to acquire the Whats App messaging service, which doesn't have any physical product at all. What Whats App offered Facebook was an intricate and finely detailed web of its users' friendships and social lives.

Facebook promised the European commission then that it would not link phone numbers to Facebook identities, but it broke the promise almost as soon as the deal went through. Even without knowing what was in the messages, the knowledge of who sent them and to whom was enormously revealing and still could be. What political journalist, what party whip, would not want to know the makeup of the Whats App groups in which Theresa May's enemies are currently plotting? It may be that the value to Amazon is not so much the 460 shops it owns, but the records of which customers have purchased what.

Competition law appears to be the only way to address these imbalances of power. But it is clumsy. For one thing, it is very slow compared to the pace of change within the digital economy. By the time a problem has been addressed and remedied it may have vanished in the marketplace, to be replaced by new abuses of power. But there is a deeper conceptual problem, too. Competition law as presently interpreted deals with financial disadvantage to consumers and this is not obvious when the users of these services don't pay for them. The users of their services are not their customers. That would be the people who buy advertising from them – and Facebook and Google, the two virtual giants, dominate digital advertising to the disadvantage of all other media and entertainment companies.

The product they're selling is data, and we, the users, convert our lives to data for the benefit of the digital giants. Just as some ants farm the bugs called aphids for the honeydew they produce when they feed, so Google farms us for the data that our digital lives yield. Ants keep predatory insects away from where their aphids feed; Gmail keeps the spammers out of our in boxes. It doesn't feel like a human or democratic relationship, even if both sides benefit.

31. According to Paragraph1, Facebook acquired Whats App for its ____.

- A. digital products
- B. user information
- C. physical assets

D. quality service

32. Linking phone numbers to Facebook identities may _____.

- A. worsen political disputes
- B. mess up customer records
- C. pose a risk to Facebook users
- D. mislead the European commission

33. According to the author, competition law _____.

- A. should serve the new market powers
- B. may worsen the economic imbalance
- C. should not provide just one legal solution
- D. cannot keep pace with the changing market

34. Competition law as presently interpreted can hardly protect Facebook users because _____.

- A. they are not defined as customers
- B. they are not financially reliable
- C. the services are generally digital
- D. the services are paid for by advertisers

35. The ants analogy is used to illustrate _____.

- A. a win- win business model between digital giants
- B. a typical competition pattern among digital giants
- C. the benefits provided for digital giants' customers
- D. the relationship between digital giants and their users

Text 4

To combat the trap of putting a premium on being busy, Gal Newport, author of *Deep Work: Rules for Focused Success in a Distracted world*, recommends building a habit of “deep work”,—the ability to focus without distraction.

There are a number of approaches to mastering the art of deep work- be it lengthy retreats, dedicated to a specific task; developing a daily ritual; or taking a “journalistic” approach to seizing moments of deep work when you can throughout the day. Whichever approach, the key is to determine your length of focus time and stick to it.

Newport also recommends “ deep scheduling” to combat constant interruptions and get more done in less time. At any given point, Newport has deep work scheduled for roughly the next month. Once on the calendar I protect this time like, I would a doctor's appointment or important meeting ,he writes.

Another approach to getting more done in less time is to rethink how you prioritize your day -in particular how we craft our to - do lists. Tim Harford, author of *Messy. The Power of Disorder to Transform Our Lives*, points to a study in the early 1980s, that divided undergraduates into two groups: some were advised to set out monthly goals and study activities; others were told to plan activities and goals in much more detail day by day.

While the researchers assumed that the well- structured daily plans would be most effective when it came to the execution of tasks, they were wrong: the detailed

daily plans demotivated students. Hartford argues that inevitable distractions often render the daily to-do list ineffective, while leaving room for improvisation in such a list can reap the best results.

In order to make the most of our focus and energy. We also need to embrace downtime, or as Newport suggests, “be lazy.”

“Idleness is not just a vacation, an indulgence or a vice; it is indispensable to the brain as Vitamin D is to the body...[idleness] is, paradoxically, necessary to getting any work done,” he argues.

Sriri Pillay, an assistant of psychiatry at Harvard Medical School, believes this counter-intuitive link between downtime and productivity may be due to the way our brains operate. When our brains switch between being focused and unfocused on a task, they tend to be more efficient.

“What people don't realise is that, in order to complete these tasks they need to use both the focus and unfocus circuits in their brain”, says Pillay.

36. The key to mastering the art of deep work is to ____.

- A. keep to your focus time
- B. list your immediate tasks
- C. make specific daily plans
- D. seize every minute to work

37. The study in the early 1980s cited by Harvard shows that ____.

- A. distractions may actually increase efficiency
- B. daily schedules are indispensable to studying
- C. students are hardly motivated by monthly goals
- D. detailed plans may not be as fruitful as expected

38. According to Newport, idleness is ____.

- A. a desirable mental state for busy people
- B. a major contributor to physical health
- C. an effective way to save time and energy
- D. an essential factor in accomplishing any work.

39. Pillay believes that our brains' shift between being focused and unfocused ____.

- A. can result in psychological well-being
- B. can bring about greater efficiency
- C. is aimed at a better balance in work
- D. is driven by task urgency

40. This text is mainly about ____.

- A. ways to relieve the tension of busy life
- B. approaches to getting more done in less time
- C. the key to eliminating distractions
- D. the cause of the lack of focus time

Part B

Directions: Read the following text and match each of the numbered items in the left column to its corresponding information in the right column. There

are two extra choices in the right column. Mark your answers on the ANSWER SHEET. (10 points)

- A. Just say it
- B. Be present
- C. Pay a unique compliment
- D. Name, places, things
- E. Find the “me too”s
- F. Skip the small talk
- G. Ask for an opinion

Five ways to make conversation with anyone

Conversations are links, which means when you have a conversation with a new person a link gets formed and every conversation you have after that moment will strengthen the link.

You meet new people every day: the grocery worker, the cab driver, new people at work or the security guard at the door. Simply starting a conversation with them will form a link.

Here are five simple ways that you can make the first move and start a conversation with strangers.

41. _____

Suppose you are in a room with someone you don't know and something within you says “I want to talk with this person”- this is something the mostly happens with all of us. You wanted to say something- the first word- but it just won't come out. It feels like it is stuck somewhere, I know the feelings and here is my advice just get it out.

Just think: that is the worst that could happen? They won't talk with you? Well, they are not talking with you now!

I truly believe that once you get that first word out everything else will just flow. So keep it simple: “Hi”, “Hey” or “Hello”—— do the best you can to gather all of the enthusiasm and energy you can, put on a big smile and say “Hi”.

42. _____

It's a problem all of us face: you have limited time with the person that you want to talk with and you want to make this talk, memorable.

Honestly, if we got stuck, in the rut, of “hi”, “hello”, “how are you” “and what's going on?” you will fail to give the initial Jolt to the conversation that can make it so memorable.

So don't be afraid, to ask more personal questions. Trust me, you'll be surprised to see how much people are willing to share if you just ask.

43. _____

When you meet a person for the first time, make an effort to find the things which you and that person, have in common so that you can build the conversation, from that point. When you start a conversation from there and then move outward, you will find all of a sudden that the conversation becomes a lot easier.

44. _____

Imagine you are pouring your heart out to someone and they are just busy on their phone, and if you ask, for their attention, you get the response “I can Multitask”.

So when someone tries, to communicate with you, just be in that communication wholeheartedly. Make eye contact, you can feel the conversation.

45. _____

You all came into a conversation, where you first met the person, but after some time you may have met again, and have forgotten their name. Isn't that awkward!

So remember the little details of the people you might, or you talked with; perhaps the places they have been to, the place they want to go, the things they like, the thing they hate - whatever you talk about

When you remember such thing you can automatically become investor in their well being. So they feel a responsibility to you to keep bad relationship going

That's it. Five amazing ways that you can make conversation with almost anyone. Every person is a really good book to read, or to have a conversation with!

Section III Translation

Directions: *Translate the following text from English into Chinese. Write your translation on ANSWER SHEET 2. (15 points)*

A fifth grader gets a homework assignment to select his future career path from a list of occupations. He ticks “astronaut” but quickly adds “scientist” to the list and selects it as well. The boy is convinced that if he reads enough, he can explore as many career paths as he likes. And so he reads—everything from encyclopaedias to science fiction novels. He reads so fervently that his parents have to institute a “no reading policy” at the dinner table.

That boy was Bill Gates, and he hasn't stopped reading yet—not even after becoming one of the most successful people on the planet. Nowadays, his reading material has changed from science fiction and reference books: recently, he revealed that he reads at least 50 nonfiction books a year. Gates chooses nonfiction titles because they explain how the world works.

“Each book opens up new avenues of knowledge to explore,”——Gates say.

Section IV Writing

Part A

Directions: *Suppose you have to cancel your travel plan and will not be able to visit professor Smith. Write him an email to*

1) apologize and explain the situation;

2) suggest a future meeting.

You should write about 100 words on the ANSWER SHEET.

Don't use your own name, use “Li Ming” instead.

Don't write your address. (10 points)

Part B

Directions: Write an essay based on the following chart. In your essay, you should

1) interpret the chart, and

2) give your comments.

You should write about 150 words neatly on the ANSWER SHEET. (15 points)

【翻译参考译文】

一名五年级的学生的家庭作业要求他从一系列的职业中选出他未来的职业道路。他选择了“宇航员”，但很快又将“科学家”加入名单，也选了这一职业。这个男孩确信如果他读的书足够多，他就能想探索多少条职业道路，就探索多少条。因此他读书——从百科全书读到科幻小说。他如此狂热地阅读以致于他的父母不得不制定一条吃饭时“不能读书”的规矩。

这个男孩就是比尔·盖茨，他从未停止过阅读 – 即便在他成为全球最成功人士之后也如此。今天，比尔盖茨的读物已经不再是科幻小说和参考书目：最近，他表示自己每年至少阅读 50 本非虚构读物。盖茨选择读非虚构类图书，因为这些书解释了世界是如何运作的。

“每本书都开辟了探索新知识的道路。” 比尔盖茨说。

【参考范文一】

Dear Professor Smith,

How have you been recently? I am exceedingly sorry to tell you that although I have promised to visit you this Friday, I have to cancel my travel plan because of the following reason.

Two days ago, I suddenly accepted the notice that there would be an academic meeting this Friday night in our department and everyone was asked to attend. I know that my changing plan has definitely caused some inconvenience to you. I am so sorry for my failing to keep the promise of visiting you. Therefore, in order to make up this situation, I wonder if you could give me another chance and spare some time to meet me next Monday.

I am so sorry for any inconvenience caused by me. Hope you can accept my apology and arrange a new time for me to visit you. I am looking forward to your reply.

Yours sincerely,
Li Ming

【参考范文二】

Emerging from the clearly depicted pie chart is the distribution of focusing factors of citizens in a city when choosing a restaurant in 2017, consisting of 4 parts, which are features, service, environment, price and other factors. Among them, the proportion of service, environment, price and other factors is 26.8%, 23.8%, 8.4% and 4.7% respectively. By contrast, the factor of focusing on features of the restaurant is in the lead, accounting for 36.3%.

What has triggered this phenomenon? To begin with, with the fast development of national economy and personal wealth, people in China have stepped into an era of enjoying life, transforming traditional pattern of living. Therefore, such a great proportion of citizens are more likely to focus on the features of a restaurant, instead of only concentrating on the price. Moreover, in a society where living standard is highly advocated, citizens in mounting numbers in China, shrugging off their former habit of focusing on lower price, gradually find the service and environment of a restaurant is an essential factor. According to a survey conducted by China Research Center, up to 87% Chinese people prefer to choose a comfortable and fashionable restaurant when they go out for eating.

Taking into account what has been argued so far, I am inclined to think about the current situation is normal. In view of the analysis above, it can be predicted that the trend will continue in the future. Accordingly, it is of no necessity for the public to regard it with too much consideration.
